CYB001

Third Cybernetic event to hit the Southwest!

- **Scorpio and Capslock (NL) confirmed as headliners**
- **3 rooms of underground electronic music**
- **Live projected visuals**
- **Record stall**

Following the successful launch of the first Cybernetic event in May 2008 and follow up event in June, The lads are back with the third instalment of their own blend of underground sounds taking part in club Favela (17 Mayflower Street, Plymouth) on Saturday 23rd of August 2008. Established by local Plymouth based residents DJ Contort, Buckaroo and Outlaw the night has already proved a massive success with previous events now topping two hundred party goers. The event features an array of local and international talent with the infamous DJ Scorpio heading up this episode's chaos alongside Holland's DJ Capslock! With 3 rooms and respective music styles to choose from... this one is sure to take no prisoners!

The three organisers are no strangers to promoting successful dance events; Plymouth based night "Dimensional Schizm" and the "Cornish Underground" being two nights that these promoters have under their belts. This Southwest collective of local DJs, producers and promoters have now joined forces in order to promote a regular night which will appeal to people who fancy something a little harder.

Press Release (continued)

Adam Stockman, Cybernetic co-promoter says "we pride ourselves in being 100% dedicated to this blend of cutting edge, harder underground dance music and we are focused on giving local talent an outlet. If anyone wants to get involved with Cybernetic or would like to know more please email us at contort_uk@hotmail.co.uk or get in touch through the web page <http://www.myspace.com/cyberneticuk>".

In the true Cybernetic tradition of booking international legends such as DJ's Dolphin and Producer and Radio 1 favourite Shitmat, this forthcoming event is due to be joined by several of the most upcoming DJs on the Southwest scene. Cybernetic runs from 9pm until 6am with tunes ranging from breaks to breakcore and techno to gabber. The scene is set for this to be one of the most unique nights on the local clubbing calendar.
